Multi Function Instructions

RugKing 5 Pro

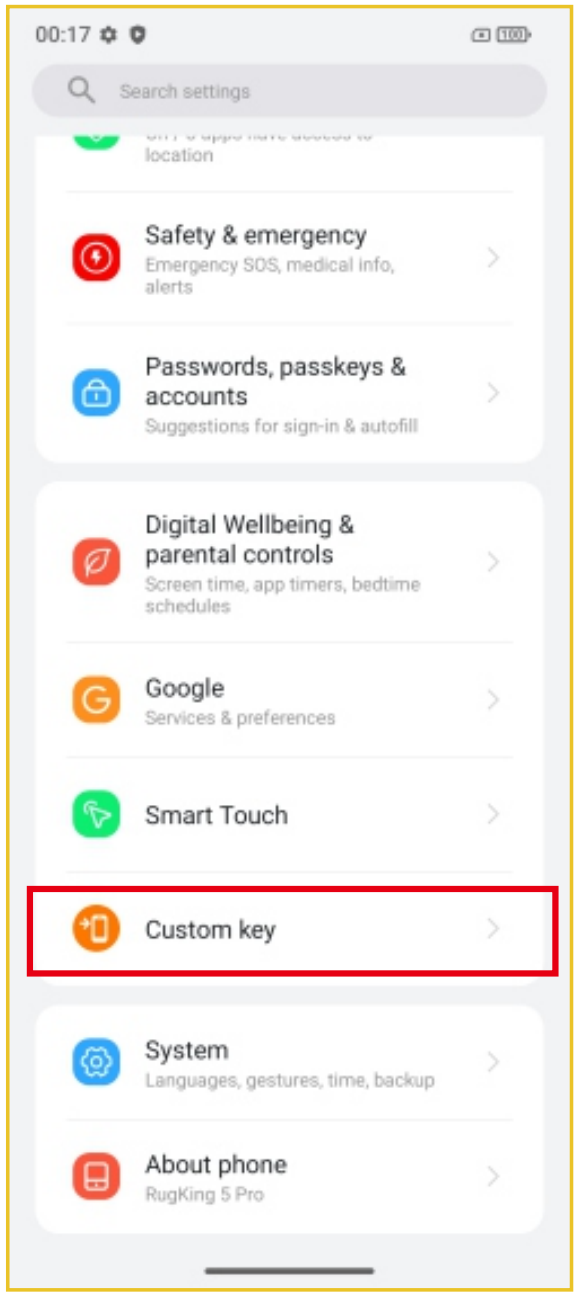

Custom Key

- Enter the Settings and locate the 'Custom Key' option.

Step 1

Step 2

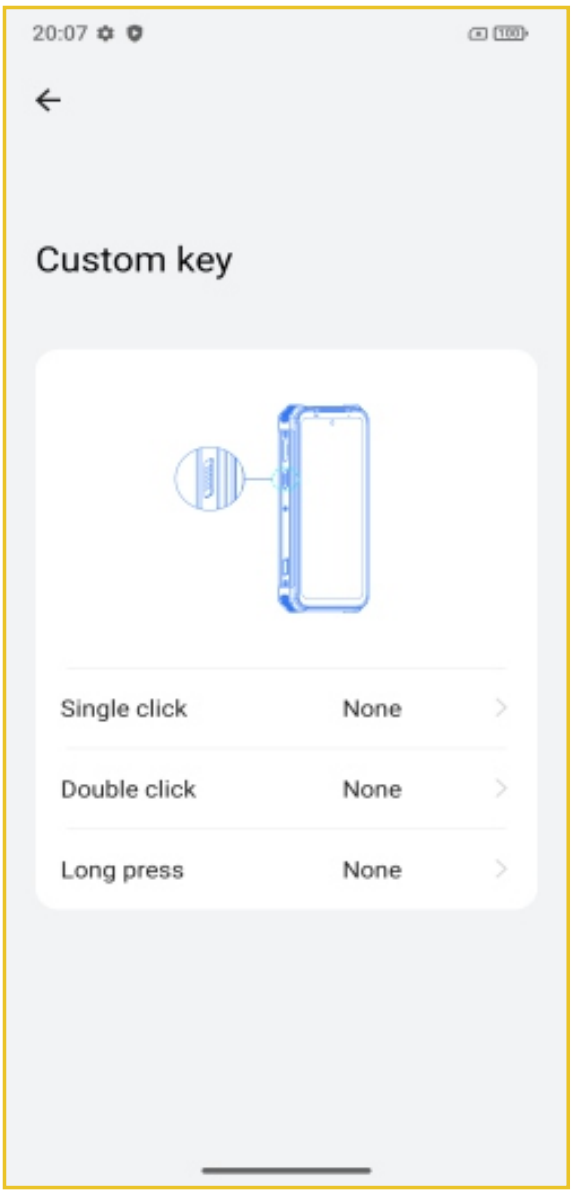

Custom Key

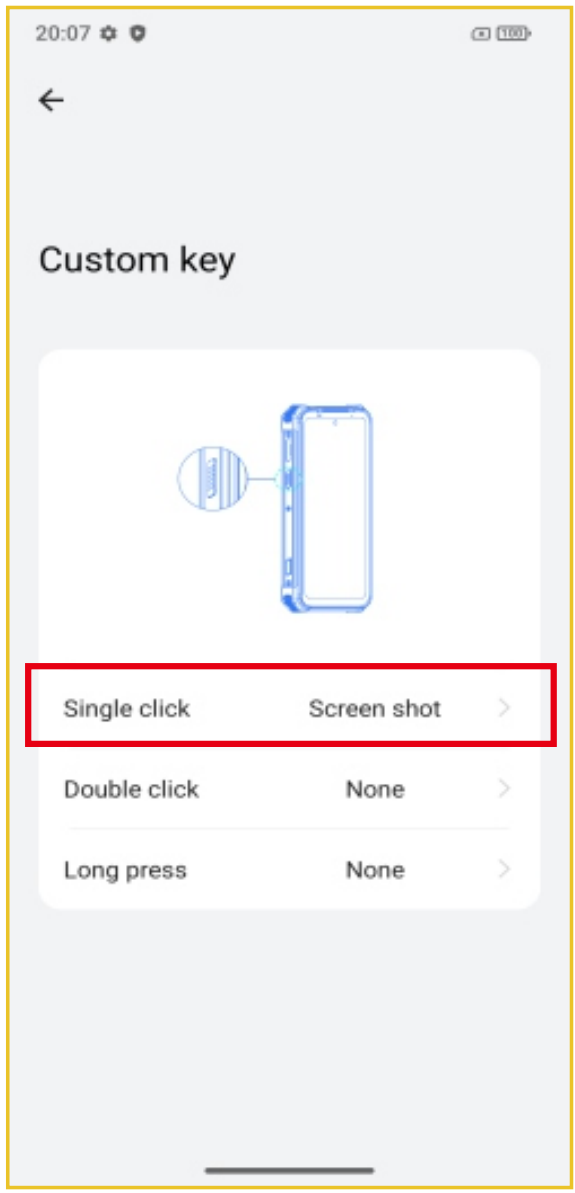

- You can set up to 3 different shortcuts simultaneously*: single click, double click, and long press.
- To configure these shortcuts, tap on single click, double click, or long press to select and activate your preferred app.

*Some shortcut features might be defaulted to only one way (e.g., certain specific functions might only be activated by a long press and cannot be changed).

Step 3

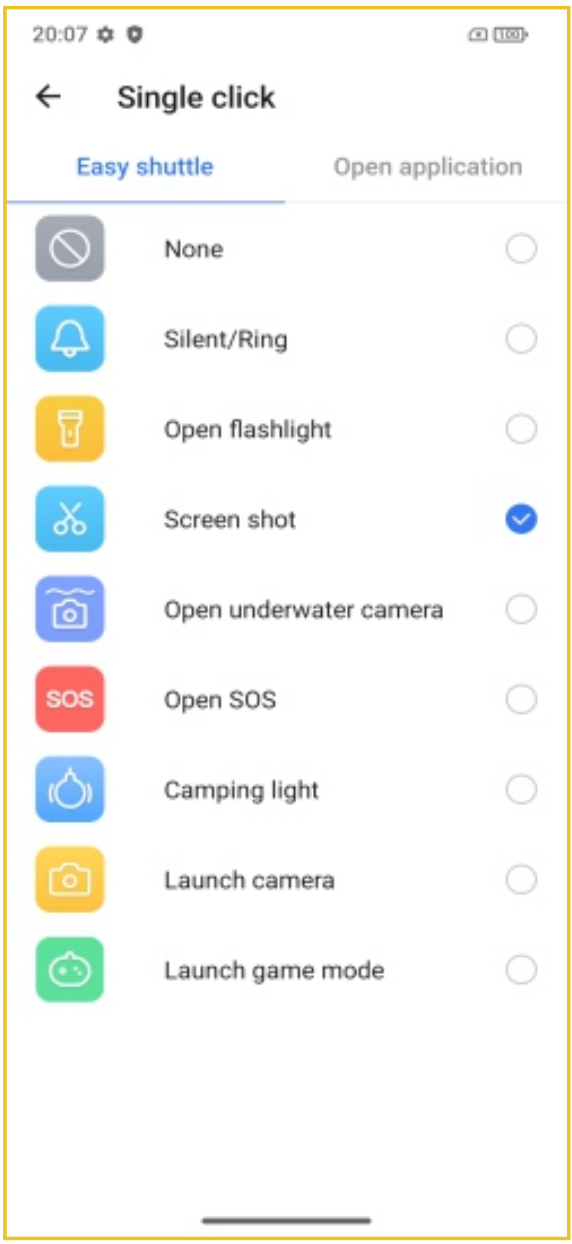

Step 4

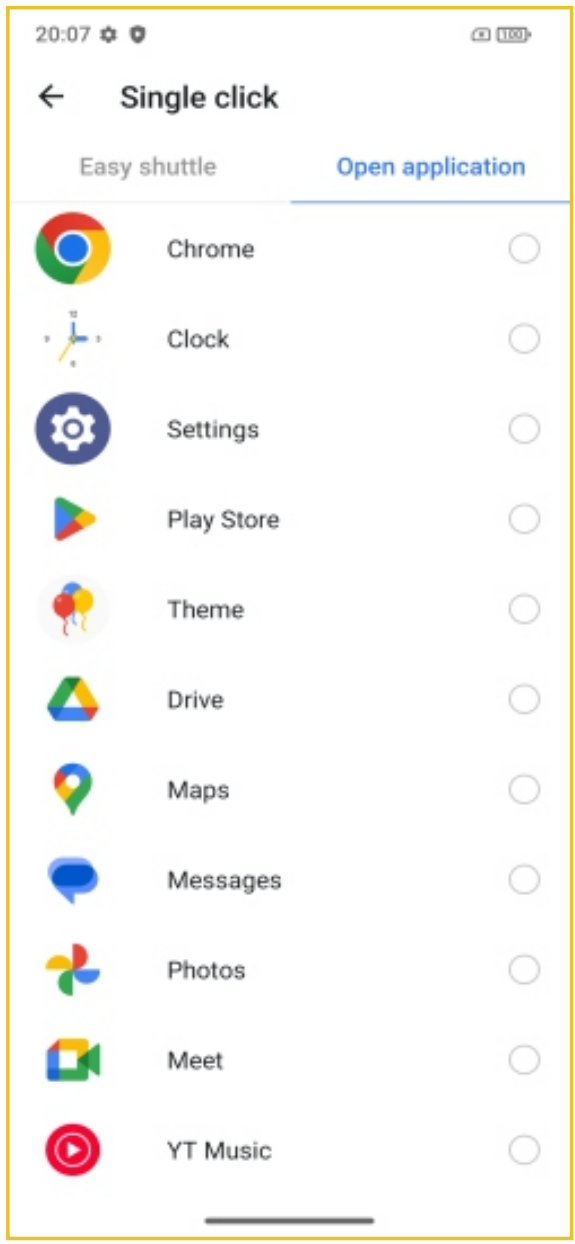

Custom Key

- You can assign these shortcuts to access features such as recording, flashlight, screenshot, underwater camera, SOS, Zello, and more, or to any installed apps on your phone with a single click, double click, or long press.

Step 5

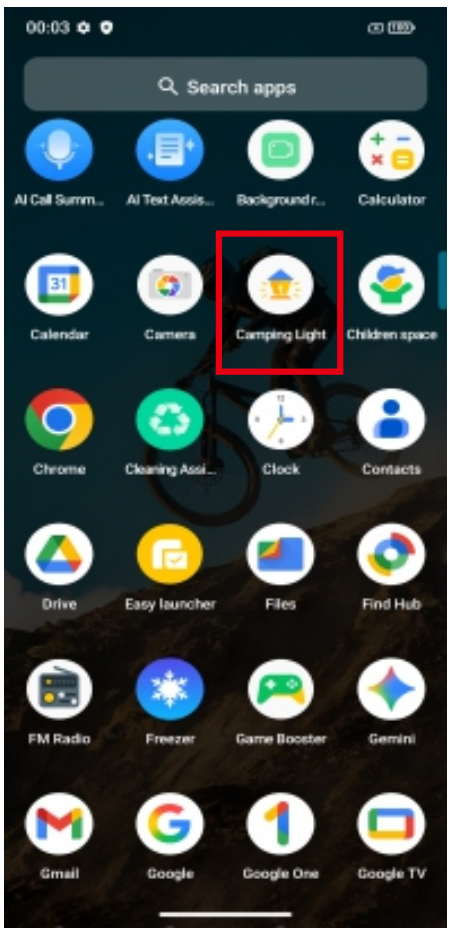

Step 6

Camping Light

- The Camping Light app provides a user-friendly and intuitive User Interface and runs in the background. It allows for optional modes and adjustable settings of brightness and duration. And overheating protection is installed.
  Supports One-key operation:
  >Enter Settings>Tap Custom Key
  >Select Single Click, Double Click, or Long Press to enter
  >Tap 'Easy shuttle', and check 'Camping Light'.
  >You can always press the Custom Key for quick access to the Camping Light app according to your previous setting.
  >Long press the 'M' button on the side of the device to turn the camping light on or off.

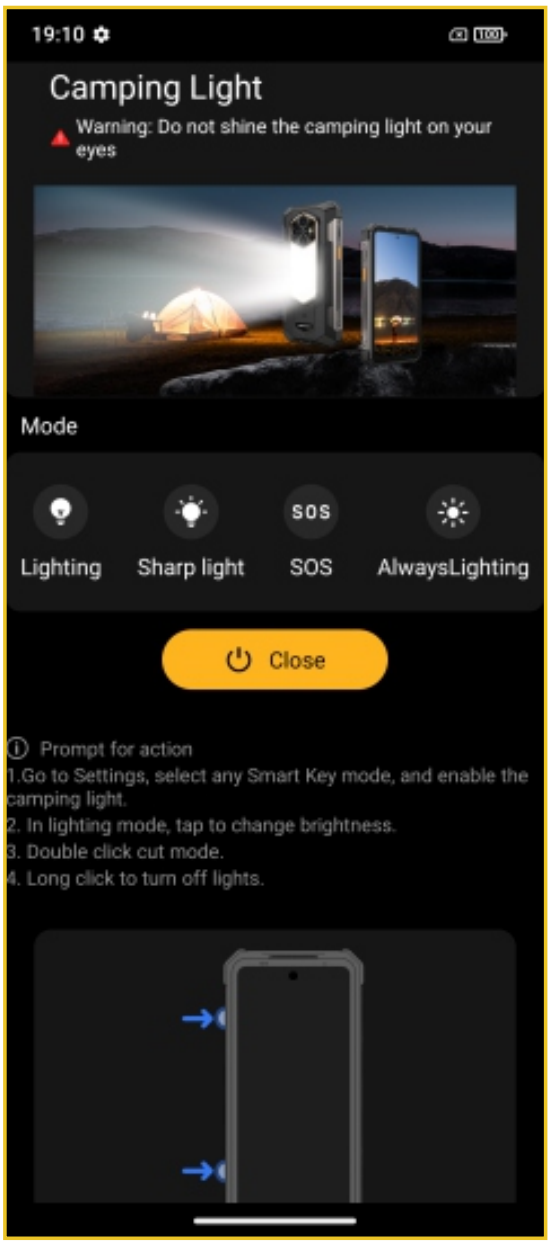

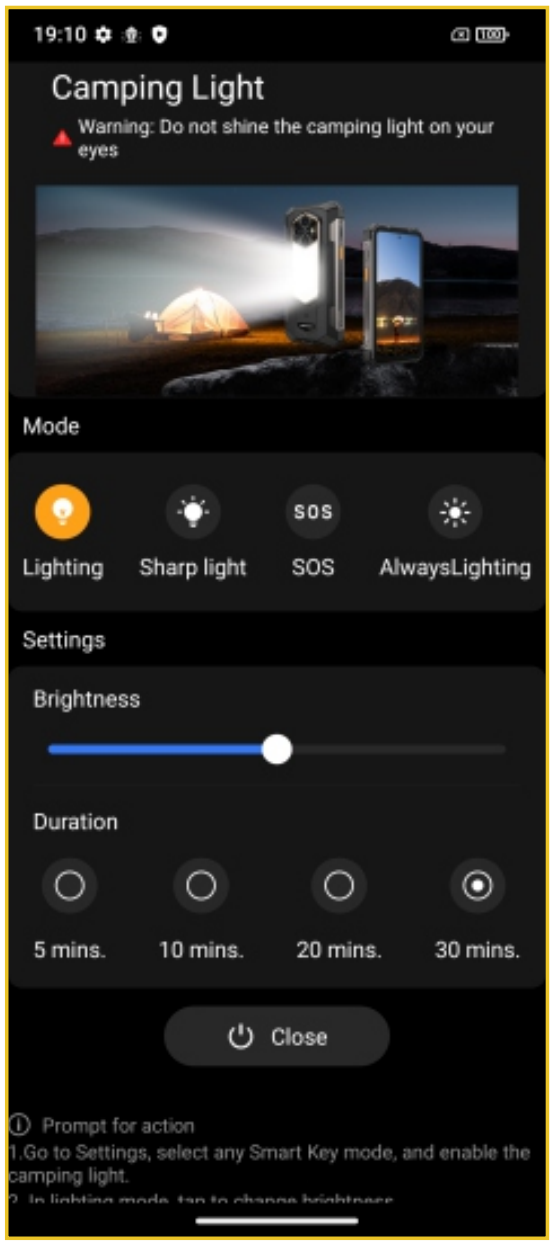

⚠ Warning: The Camping light is too bright to stare at directly. Do not irradiate light-sensitive e quipment at close range.

Camping Light

- The lighting mode is versatile for setting up a campsite, night fishing, hiking, cycling, or any other tasks that require adequate lighting.

  Brightness settings: Scroll the bar to change brightness.
  Duration settings: Check the duration from 5 to 30 minutes.

Lighting Mode

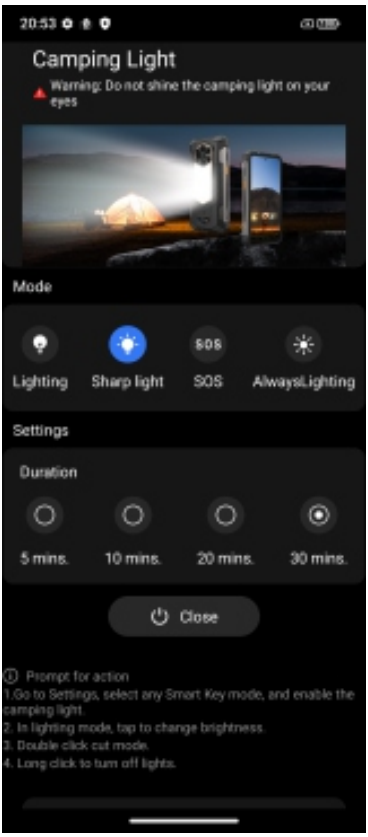

Camping Light

- The sharp light mode offers a more focused and intense beam of light for situations where a stronger and more concentrated light source is needed, such as when searching for objects, signaling, or navigating in low-light conditions.

  Duration settings: Check the duration from 5 to 30 minutes.

- SOS mode is an emergency signal for distress or help when you need to attract attention and communicate your need for assistance.

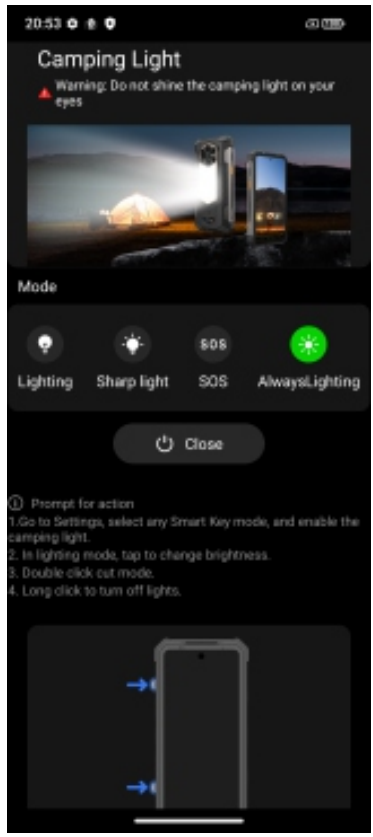

- AlwaysLighting mode offers a way to keep the camping light illuminated continuously.

SOS Mode

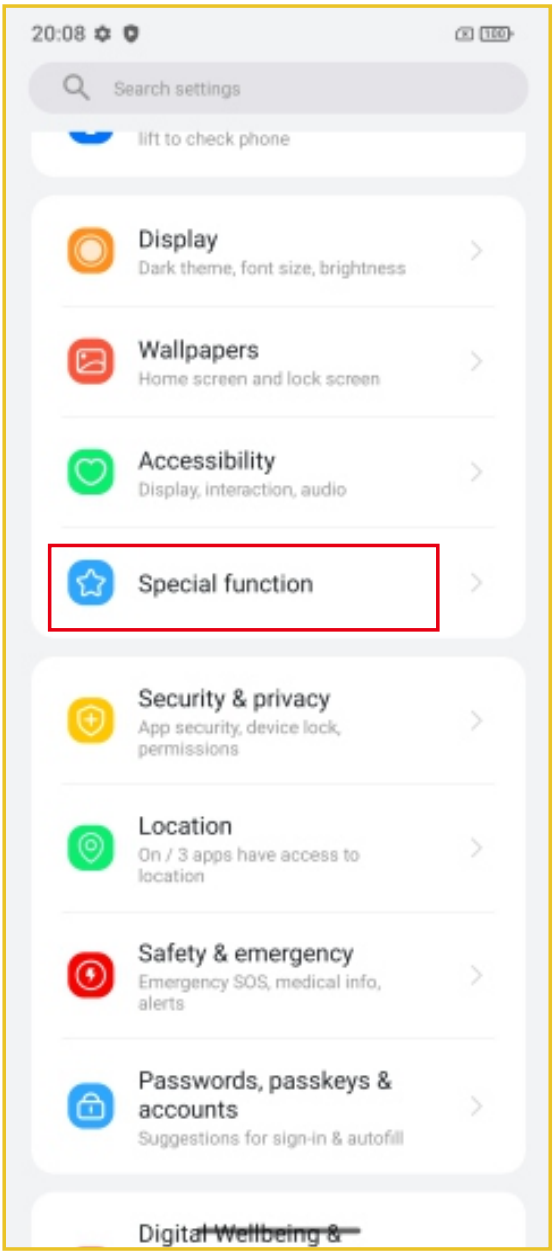

Always Lighting

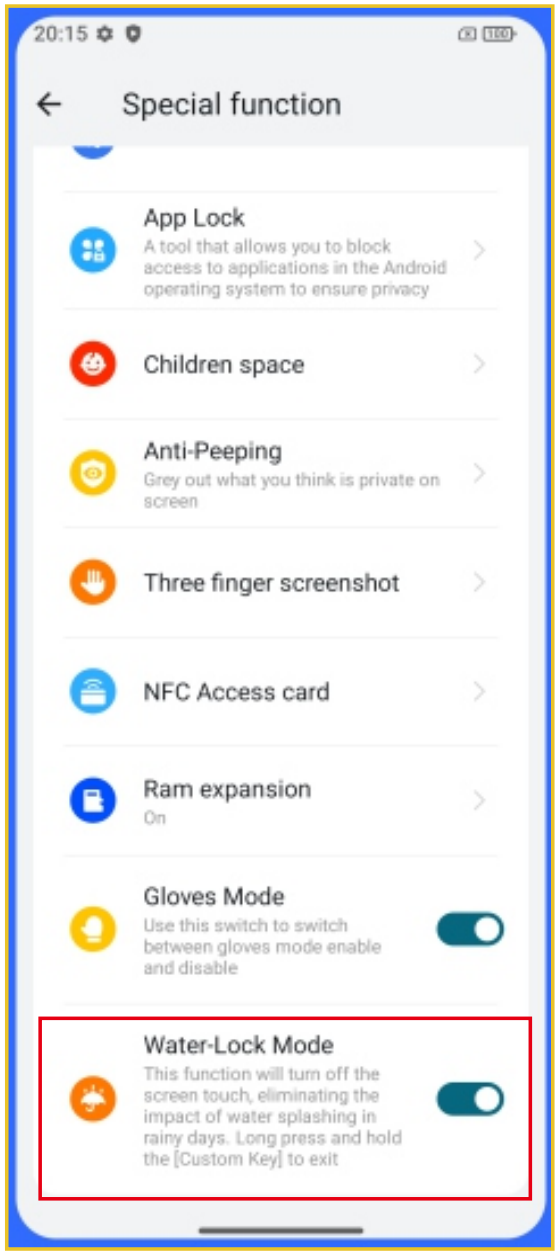

Water-Lock Mode

- Enter the Settings, find Special function, tap and enable Water-Lock Mode.

Step 1

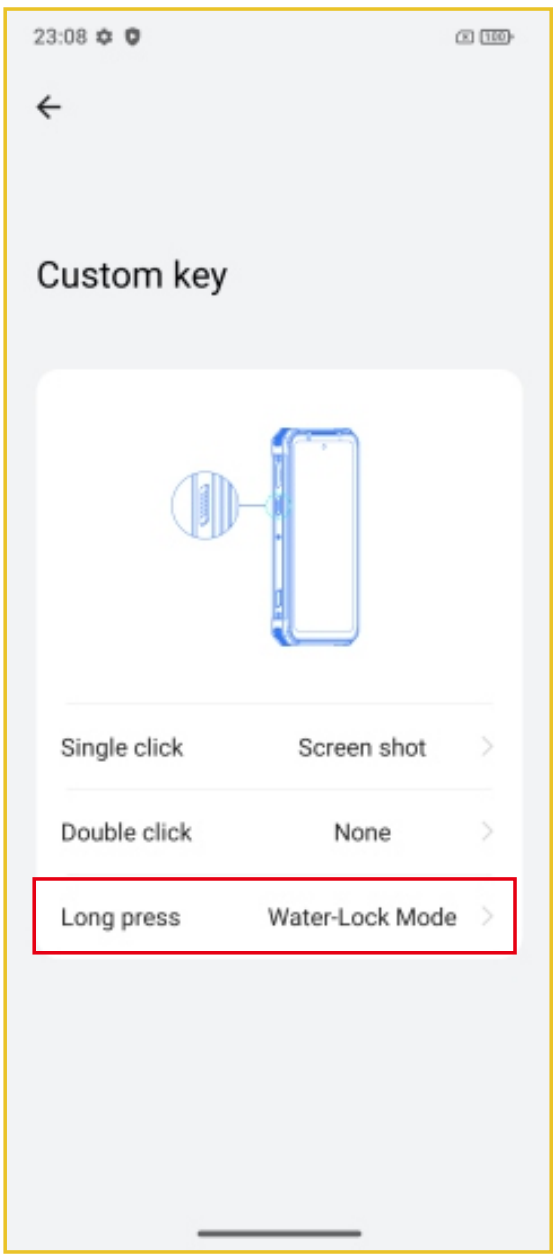

Step 2

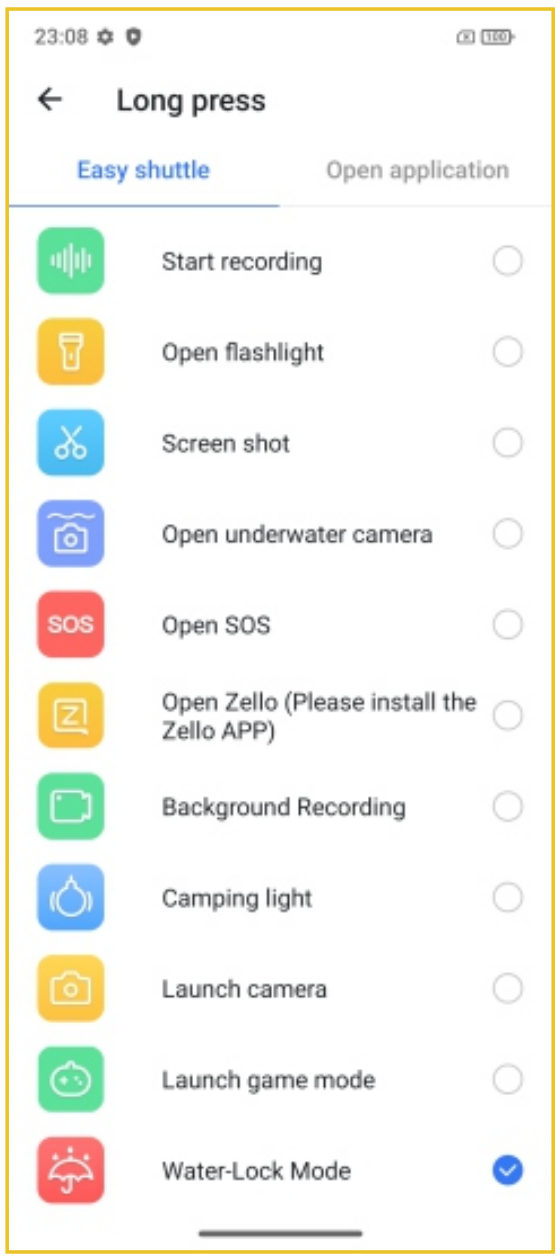

Water-Lock Mode

- Set the Custom Key (Long Press) to Water-Lock Mode to easily toggle the feature on and off.

Step 3

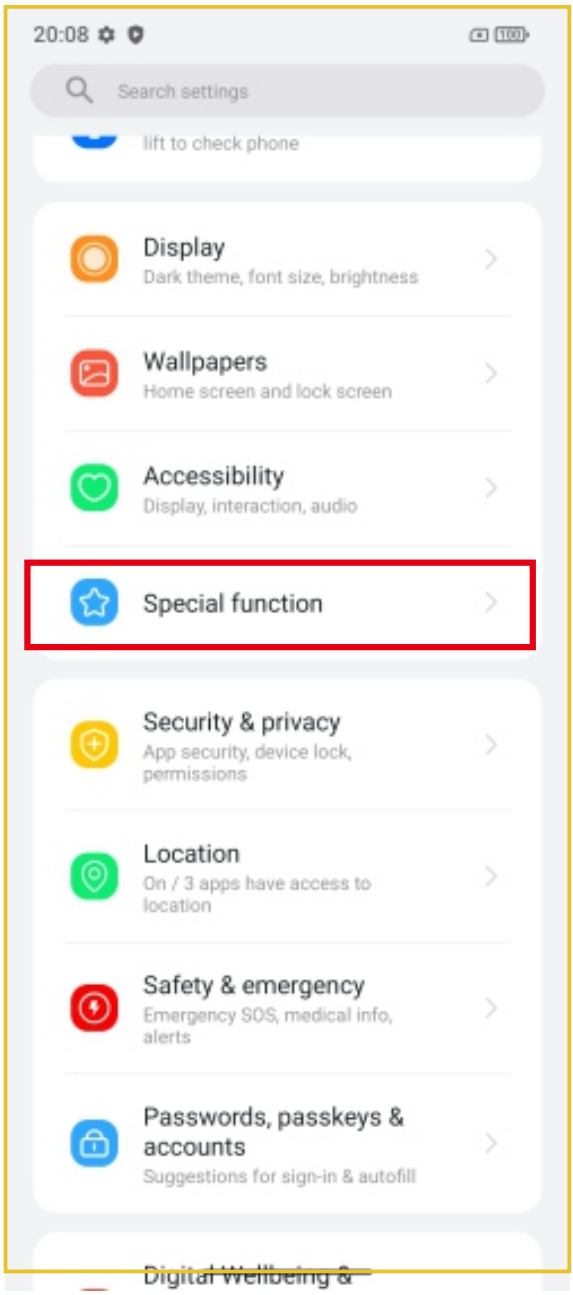

Step 4

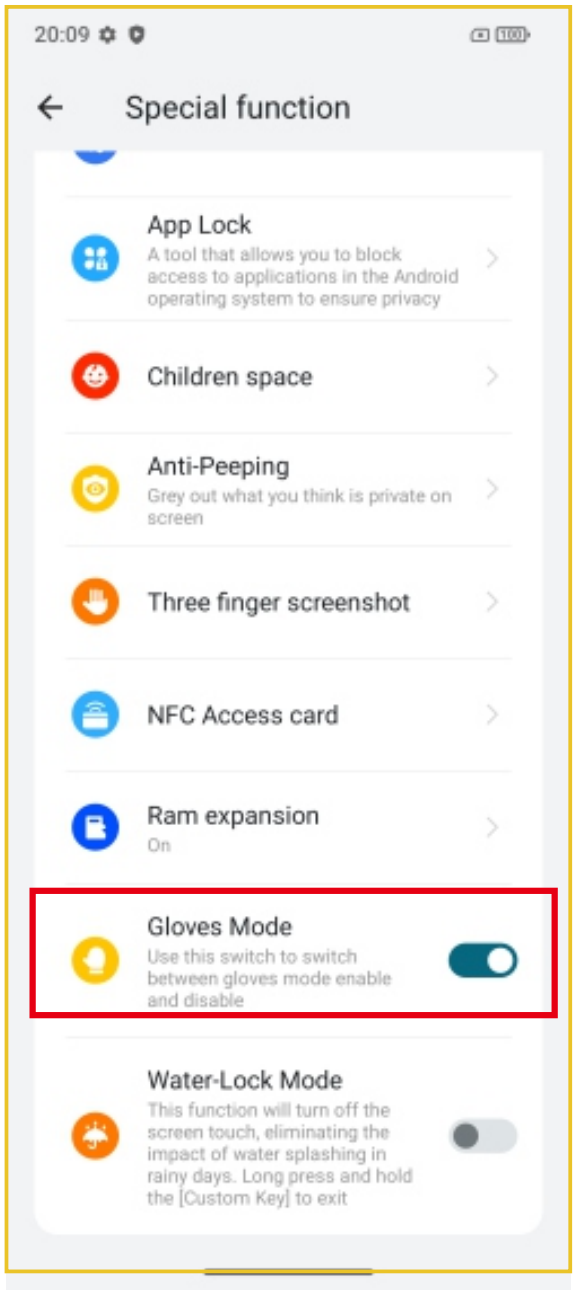

Gloves Mode

- Enter the Settings, find Special function, tap and enable Gloves mode.

Step 1

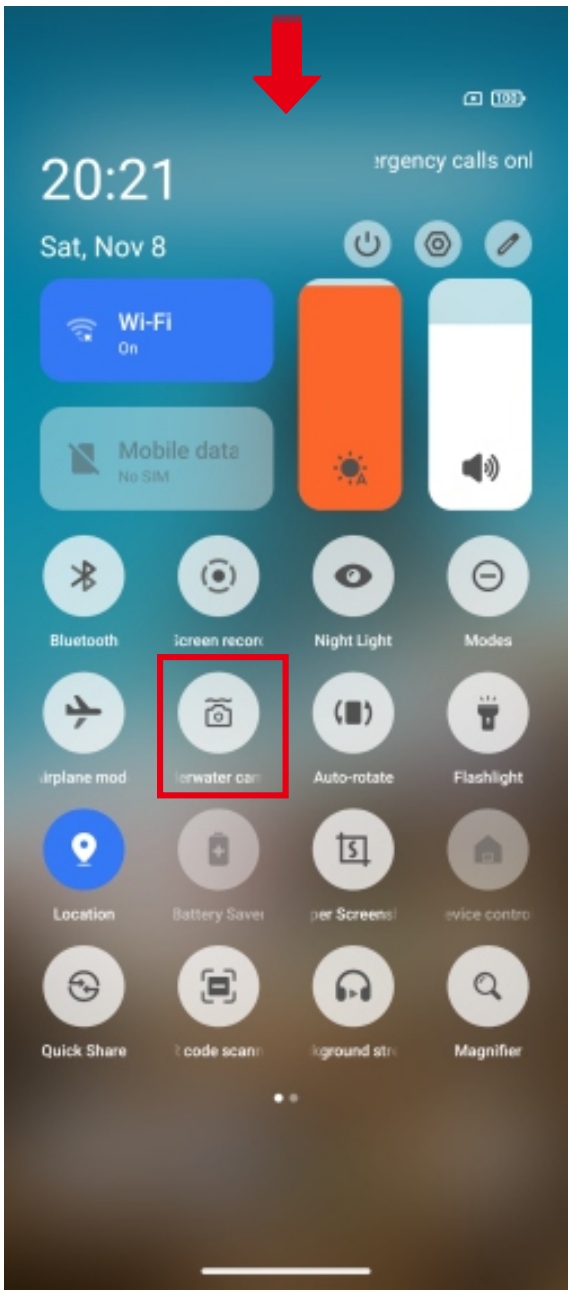

Step 2

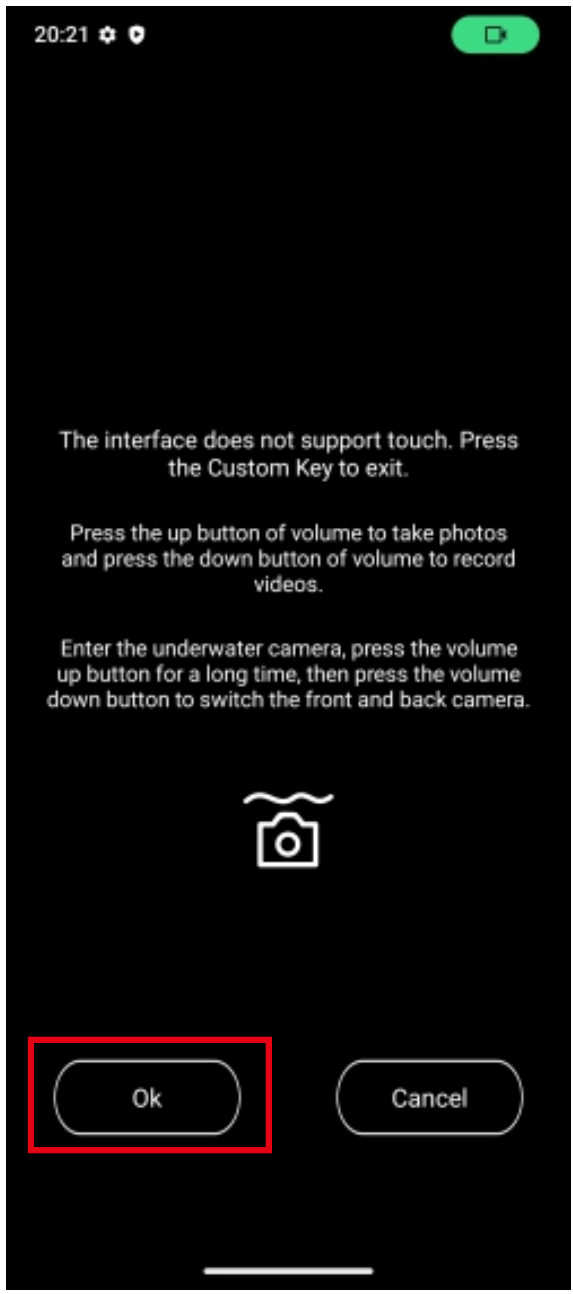

Underwater Camera

- Pull down the Quick Setting Menu or press the Custom Key according to your previous setting to activate the underwater camera.

Step 1

Step 2

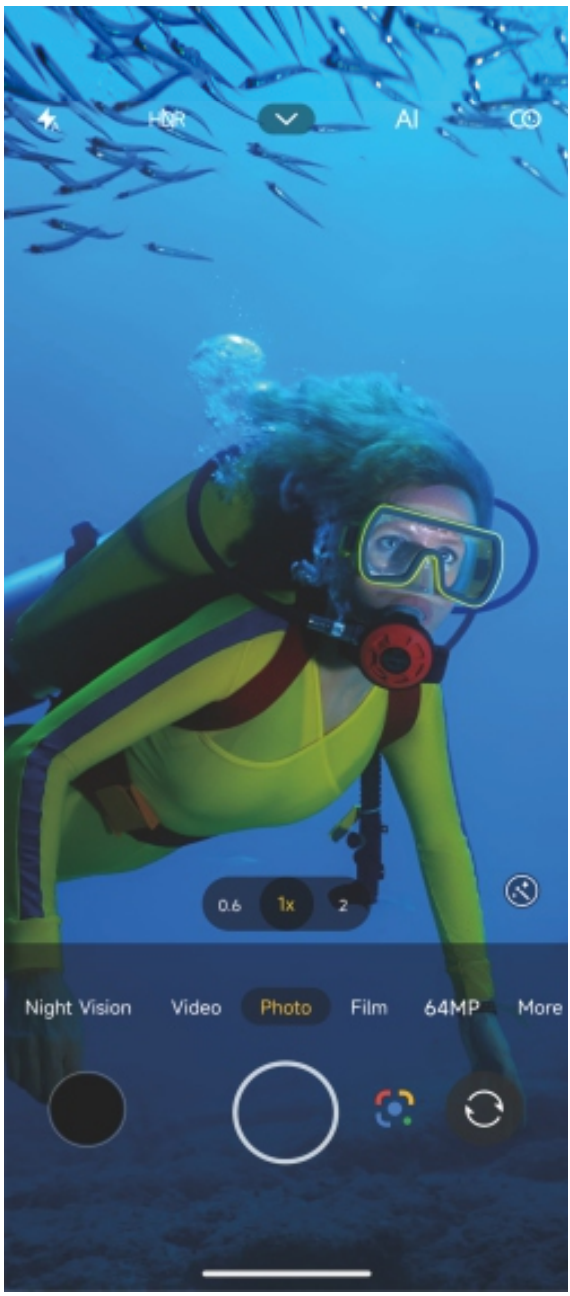

Underwater Camera

- Short press Volume “+” to take photos
- Short press Volume “-” to record videos
- First long press Volume “+” for a long time, then short
- press Volume “-” to switch to front/rear camera

Press the Custom Key to exit.

Step 3

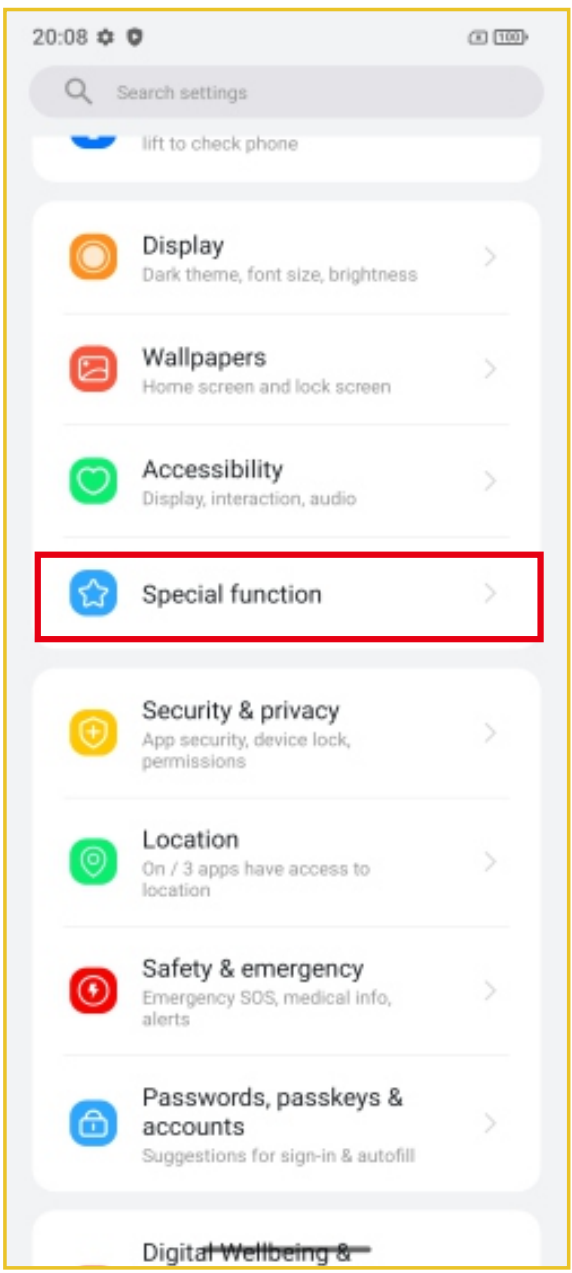

Step 4

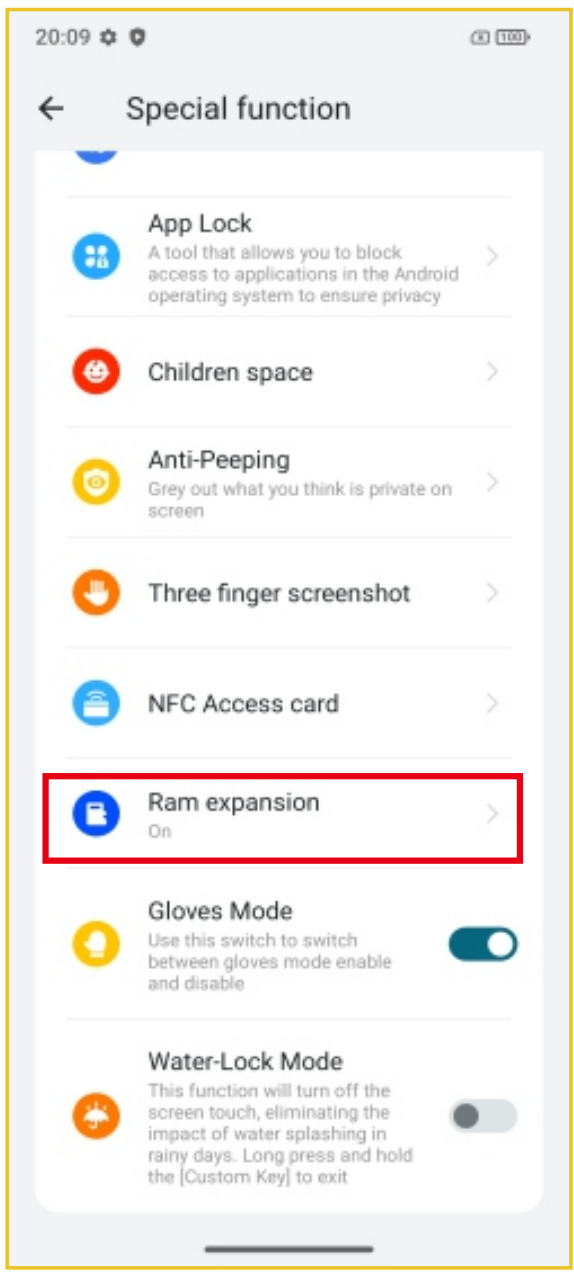

RAM Expansion

- The dynamic RAM can be extended by activating the Virtual RAM in the Settings to make the system run more smoothly.
- Go to the Settings, find 'Special function' and click on 'RAM expansion'.

Step 1

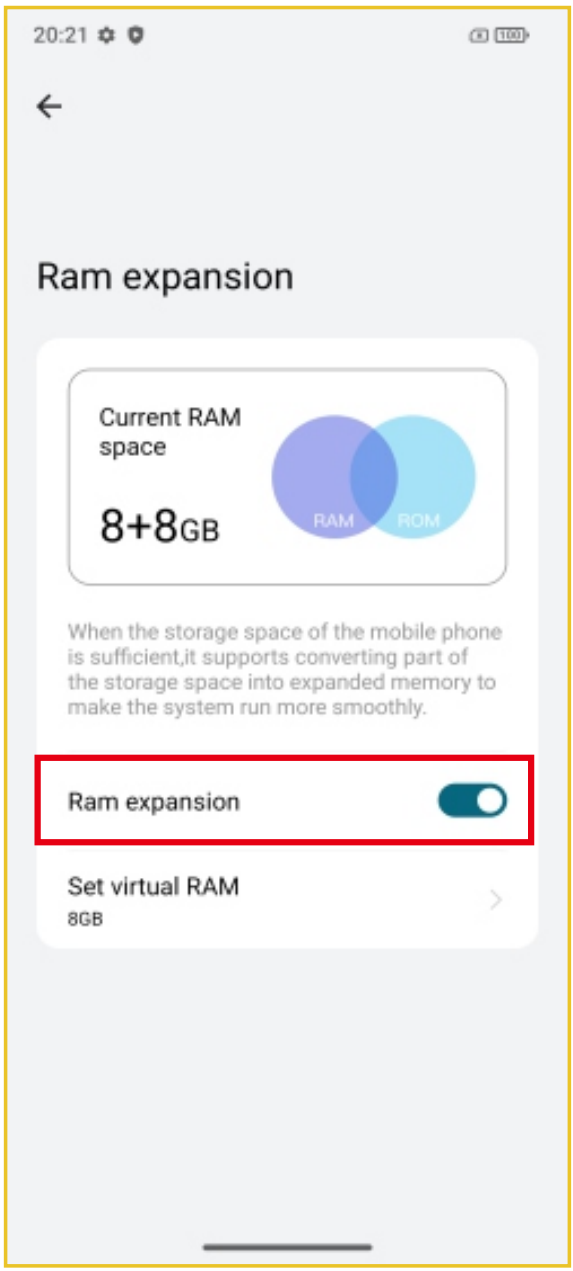

Step 2

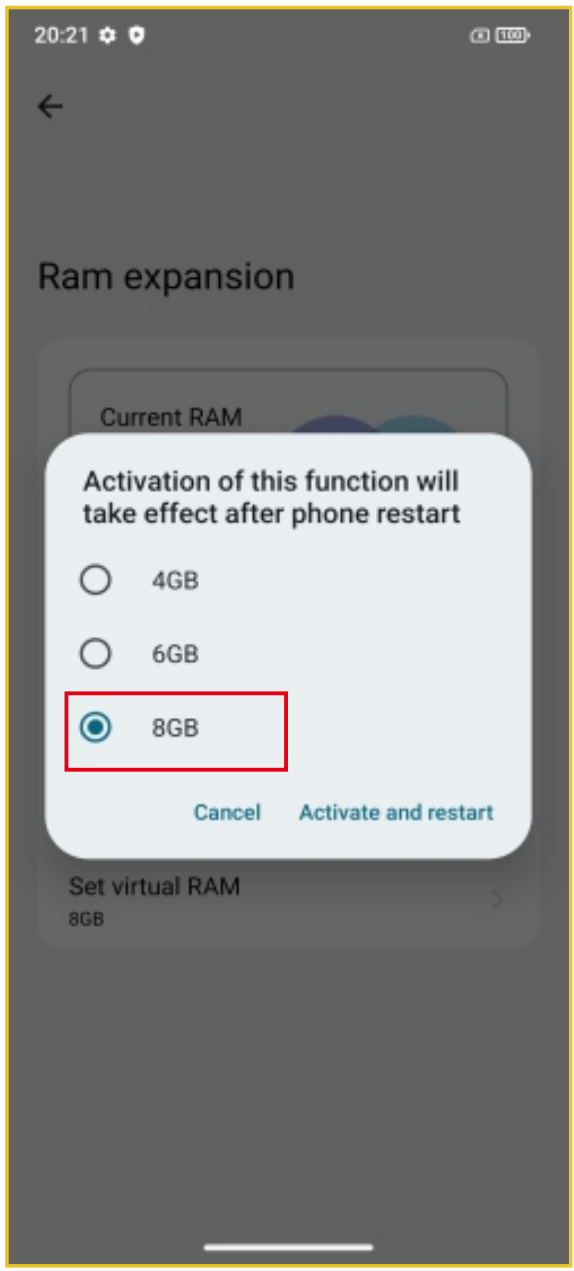

RAM Expansion

- Check the 'Ram expansion' feature and tap on "Set virtual RAM" to set the desired amount of virtual RAM.
- Tap 'Activate and restart' to enable the RAM Expansion.

Step 3

Step 4

Wired Reverse Charging

- The wired reverse charging capability enables the phone to act as a power source and charge other devices such as iPhone, tablets, smartwatches, or Bluetooth headphones through a USB cable.
  How-to-use:
  >Use a compatible cable or adapter to connect the phone to the device you want to charge.
  > Remove the USB cable or adapter when charging is finished.
